SESKO Spring Seminar 2022

# HOW

international standards and conformity assessment contribute to **economic growth**

Supporting **productivity**  
and **efficiency**

Facilitating **trade**

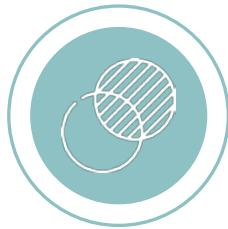

Catalyst for **innovation**

Maintaining the

## Principles at the core of IEC

Consensus

Transparency

Diversity

The IEC brings together a global network of stakeholders to develop technical solutions and best practices that connect:

Global economies

Ensure the safety and well-being of citizens

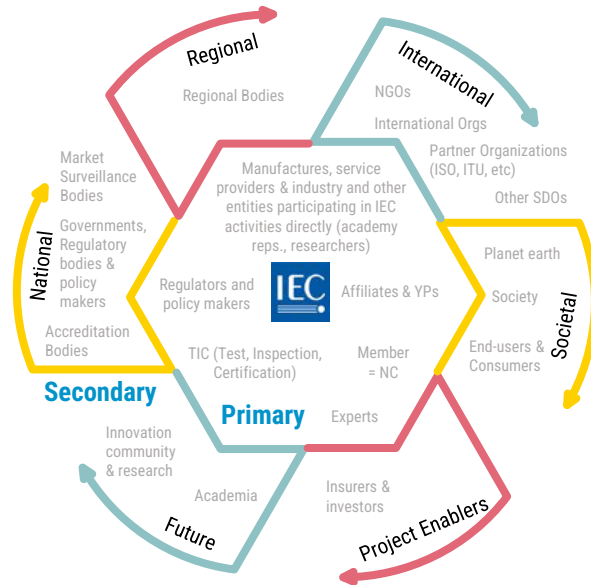

Guarantee the performance and reliability of technology

Preparing for the future with

# IEC Strategic Plan

Identify and address  
the needs of our  
stakeholders

## Operational Plan Framework

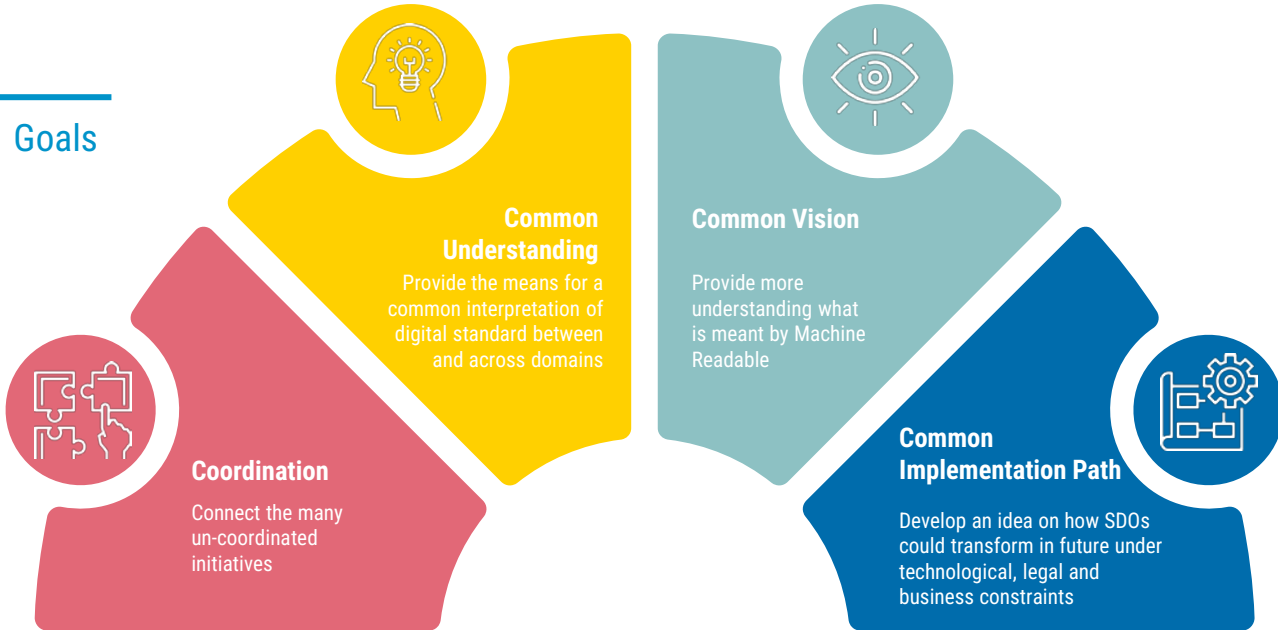

Leveraging technology to transform our services

# SMART

## Standards & CA Concept

### Goals

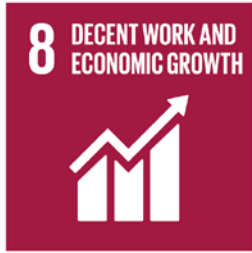

Addressing

## Regulatory & ethical perspectives

**Emerging technologies** such as artificial intelligence require input from a large pool of experts.

We offer **policy makers**, **regulators**, **researchers**, and other relevant **stakeholders** a platform to strengthen dialogue between all parties.

Conclusion

# The future of the IEC

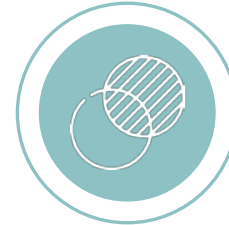

## At the nexus

between the needs  
of society and the  
economy
