Interoperability Network for the Energy Transition

int:net project and Energy Data Spaces

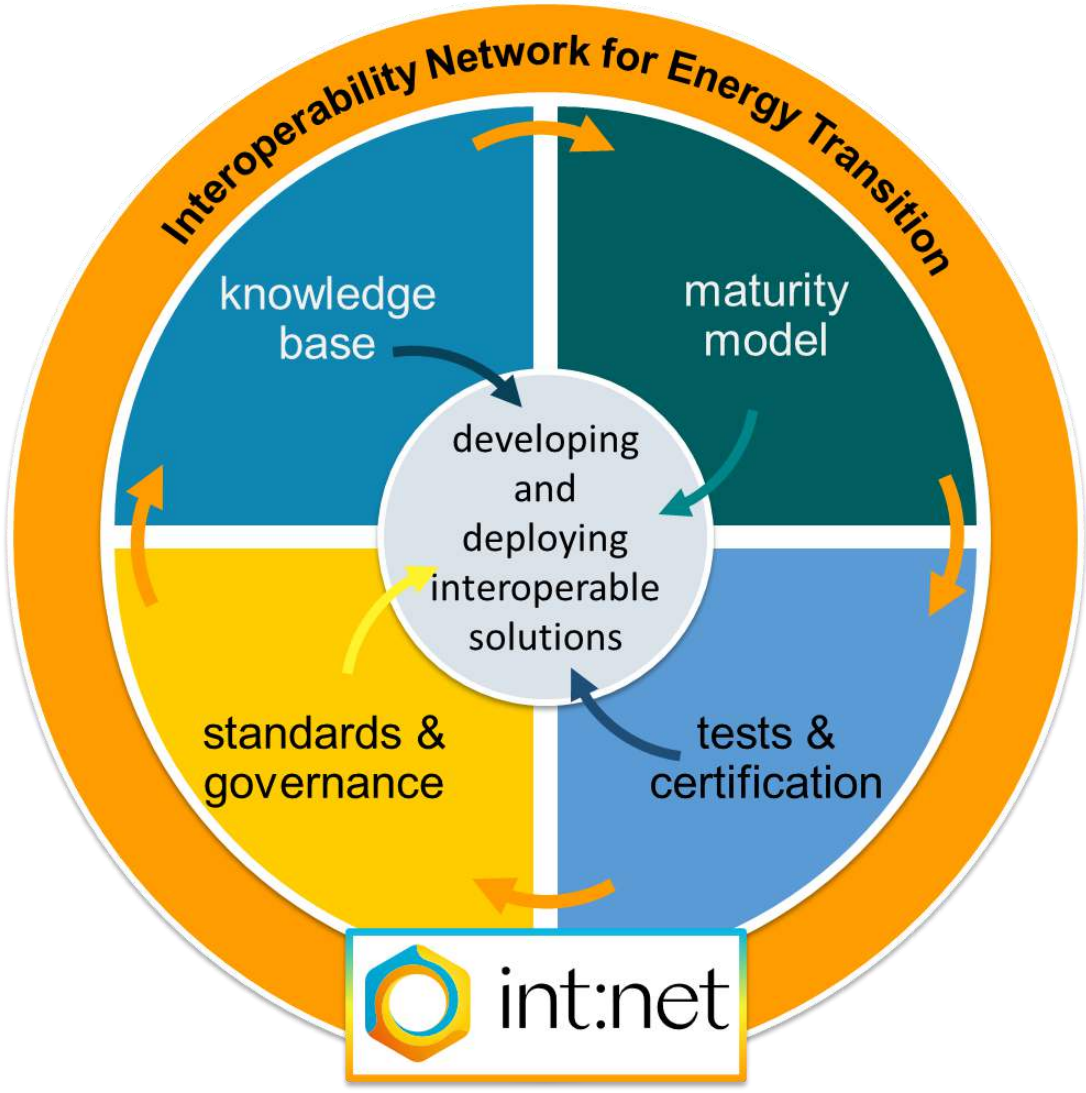
Alberto Dognini

Fraunhofer FIT

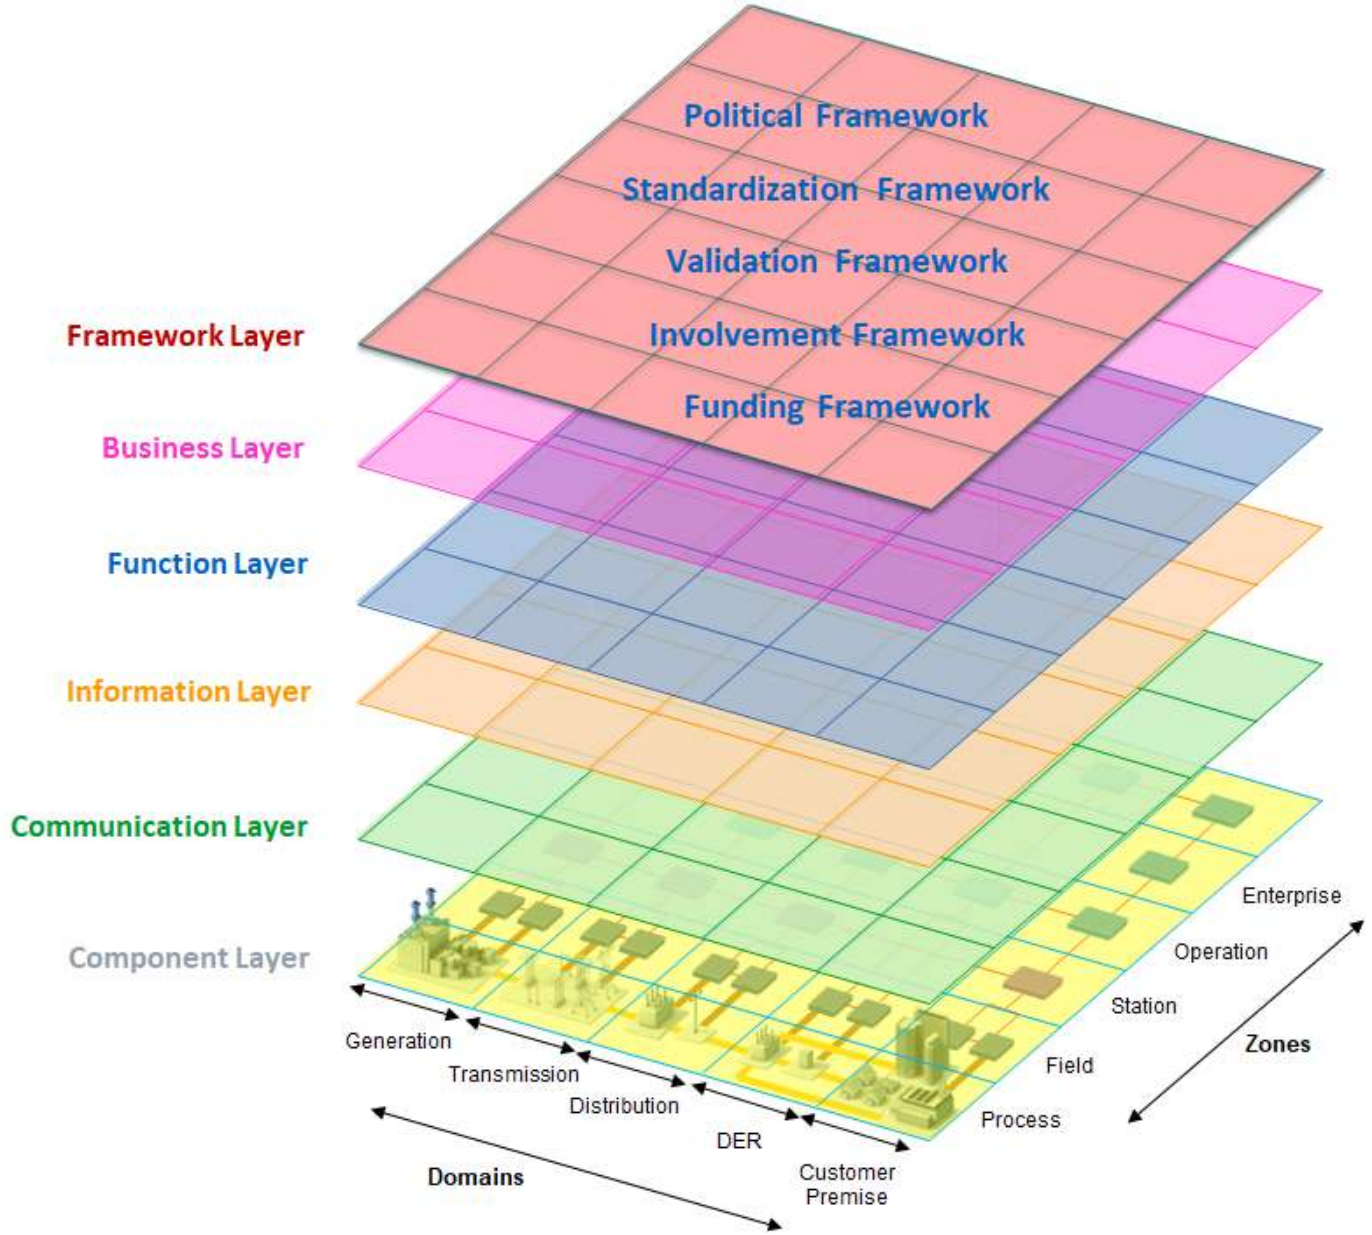
28.05.2024

int:net objectives

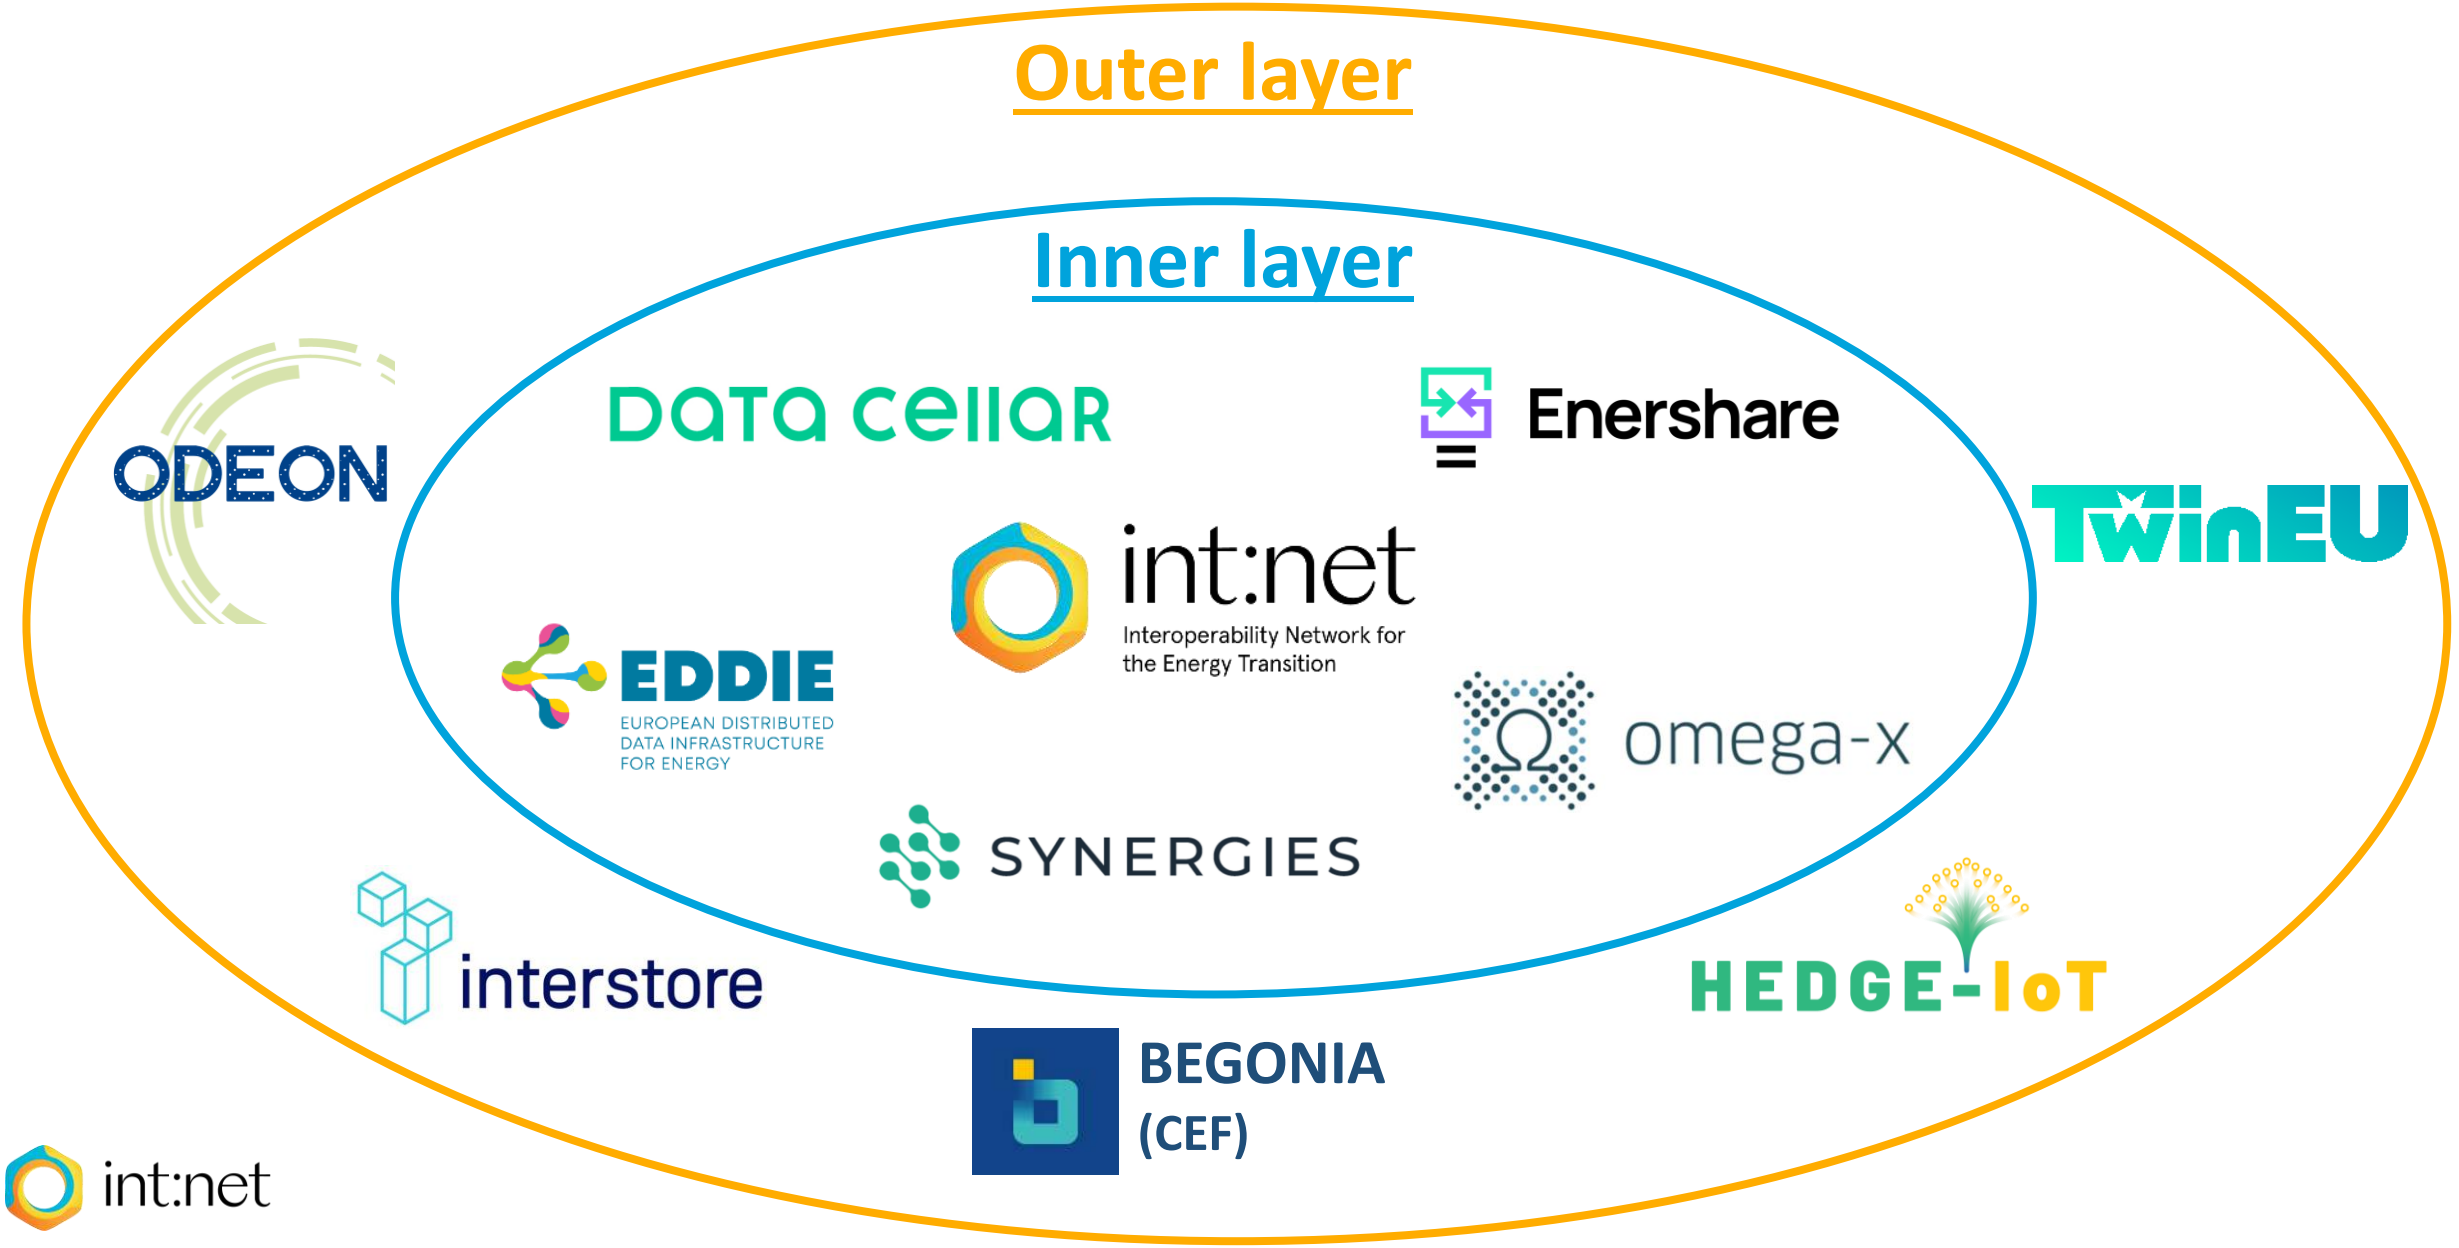
- Consolidating a **common knowledge base** for interoperability activities on energy services in Europe
- Developing a comprehensive and accepted **Interoperability Maturity Model (IMM)**
- Deploying a **framework for interoperability testing** in a network of interoperability testing facilities
- Fostering a **community network of standards and regulatory environment** for a European interoperability ecosystem



6th SGAM layer: Framework



The two layers of the cluster:



Content:

- **Business use-cases** of CEEDS:
  - Scenarios, Actors, Exchanged Data
- **Architecture**
- **Interoperability**: Technical, Semantic and Governance
