

# Strategic Perspectives on Advancing New Technologies

**Nordic YP 2025 Workshop** Helsinki, Finland, 25 – 26 June 2025

## Purpose of the Workshop

Participants have a unique opportunity to:

- ☑ Increase their knowledge about standardization
- ☑ Understand their potential in participating in standardization
- ☑ Gather insights into conformity assessment
- ☑ Meet the Conformity Assessment IEC and young professionals
- ☑ Influence the future of standards and conformity assessment

## What to Expect

Participate in group work that focuses on current technology challenges and international trade:

- ☑ Explore which growth-enabling health technologies and wearable electronics are potential for Nordic economies
- ☑ Be creative and consider what completely new security requirements a selected technology mentioned above requires
- ☑ Brainstorm how standards can support the conformity assessment of these growth-enabling technologies
- ☑ Being invited to observe a part of the IECCE Certification Management Committee (CMC) meeting
- ☑ You will be introduced to the world of standards, standardization, and conformity assessment
- ☑ Networking with same generation experts in electrical, electronic and ICT technologies from northern Europe

## Benefits for the Participants

Success criteria & goals for the workshop:

- ☑ Introduction to and understanding of the value of standards and standardization
- ☑ Understanding of international and European standardization
- ☑ Learn how Conformity Assessment is based on standardization
- ☑ Being part of a network of other Young Professionals from the Nordic region
- ☑ Understand how you can increase your influence on the content of standards

## Step-by-step Familiarization

This is not a leap into the unknown

- ☑ Get to know the workshop participants in advance in two Teams meetings
- ☑ You will receive the necessary preparatory training in advance before the workshop
- ☑ Share your thoughts F2F in interactive brainstorming sessions in Helsinki
- ☑ Build a new professional network to take care of

## Eligibility Requirements

You have started working or are finishing your studies

- Aged between early 20s to mid-30s
- Working already in a company or organization
- Completed or nearly completed studies in electrical engineering, energy, or business
- Have some experience or interest in standardization and/or conformity assessment
- Satisfactory level of English proficiency
- Be interested in developing a Nordic/international community of new standard developers
